The Georgia State University Staff Council and the Office of Institutional Research invite staff members to participate in the 2015 university-wide staff survey, which will open on Monday, June 8.

Your opinions matter! We want to hear what you have to say about your work experience here at Georgia State. When staff members throughout the university take part in the survey and share their perspectives, Staff Council, the university administration, and other decision-making groups will be better prepared to develop and maintain programs that support our staff. In so doing, we are all ultimately working to enhance the effectiveness of the university.

So, get ready! On June 8, you will receive an email from the Office of Institutional Research with instructions for taking part in the survey. The survey should take only a few minutes to complete, but your participation can have a lasting impact. Please help us get the word out and encourage participation in the survey among your co-workers.

You can learn more about the university-wide staff survey at staffcouncil.gsu.edu/staff-survey/. Additional questions or comments can be sent to the Staff Council at staffcouncil@gsu.edu or the Office of Institutional Research at tward@gsu.edu.

Absolutely Confidential

The Office of Institutional Research will use a secure website for the survey and will take great care to make this a confidential process.

All GSU staff will receive an email from the Office of Institutional Research on Monday, June 8 with a survey access code. This unique code cannot be tied to your identity and cannot be shared with others.

Survey Assistance

Throughout the survey period, a special workstation will be available in the Office of Institutional Research (1001 1 Park Place Bldg.) for staff who would like to complete the survey but don’t have access to a computer. Additionally, office staff will be available to help those who need special assistance.

A computer is not required to complete the survey, however. Staff members can use phones, tablets, or other networked devices to access and complete the survey.

We Want to Hear from You!
